

A EUROPEAN PERSPECTIVE ON HOUSING

Summer School for Young Professionals

21 – 25 August 2017
Bochum, Germany

The housing sector all across Europe has to face key challenges like ageing societies, energy efficiency and digitization or the question of inclusive neighborhoods. Despite different national frameworks, the European exchange of ideas, best practices and innovative approaches gives valuable incentives to solve problems prevalent in all European countries.

For the first time ever, young professionals of the housing sector all over Europe have the opportunity to be part of this international exchange. The interactive programme combines academic knowledge with the expertise of practitioners to develop concepts and solutions for the key challenges of housing in the 21st century.

Participate in fruitful discussions with European experts, learn about solutions and approaches of your European neighbours, find common ground with your peers and develop your own European network. Five exciting and instructional days are waiting for you in Bochum, Germany, located in the very heart of Europe.

The Summer School is offered to you by EBZ – European Education Centre for the Housing and Real Estate Sector in cooperation with EFL European Federation for Living and Housing Europe, the European Federation of Public, Cooperative and Social Housing. The Summer School is under the patronage of Gunther Adler, State Secretary at the German Federal Ministry for the Environment, Nature Conservation, Building and Nuclear Safety.

Learn from others, share your ideas, be part of Europe!
